Easy Make & Learn Projects: Animal Habitats: Reproducible Mini-Books And 3-D Manipulatives That Teach About Oceans, Rain Forests, Polar Regions, And 12 Other Important Habitats

Synopsis

Learning about the world's habitats is fun and engaging with these interactive mini-books and manipulatives. Simple text and realistic art offer children a glimpse into coral reefs, deserts, caves, rain forests, and more, and give them an understanding of how various animals and plants are adapted to these habitats. Teacher pages include background information, easy how-to's, extension activities, and print and Web resources. A great way to introduce children to science and nonfiction! For use with Grades 2–3.

Age Range: 7 - 8 years

Grade Level: 2 - 3

Customer Reviews

I have been very impressed by this resource. I love how it is not complicated. You can simply pick a topic/habitat, copy and go. Can use alone or as a supplement. Excellent in my opinion. I have a boy and a girl, ages 8 and 9 and both enjoy.

I was sad when this arrived and realized it was all in black and white. It has great material in it but I would think that some of it would be color.

I love this book. It covers every different type of habitat. The projects are fun and have facts that on right on the design of the project. I love that it compares the same type of environments in different

parts of the world. (ie. Sahara vs. Senora) Kids really enjoy learning about the habitats in this book.

I love the material inside the book; however, I didn't realize the entire book is black and white on the inside - the colorful cover of the book is deceiving - not what I was expecting.

This is going to be a great addition to the curriculum that is used where I teach. It gives many ideas and great things to help the children learn new things and review things they already know.

Not as easy as expected, projects have many little pieces to assemble which is tricky for my class. The projects themselves are very interesting and unique!

This book is fantastic. Using to homeschool 4 & 6 year old and the projects are educational, fun, and the kids have fun coloring and putting together.

Amazing book! Using it to homeschool my 1st grader. He loves the books and projects you make and it is a great resource!
