This is a novel of a post-nuclear-holocaust world in the United States. At the time it was written (and I first read it), the scenario depicted in it was a real threat. People were building bomb shelters in their back yards. I considered it, but did not because I knew enough to realize that such measures were futile. The protagonist, Randy Bragg, moves his family to the small Florida town of Fort Repose when he realizes that a nuclear attack is imminent. The book, though, is not primarily about the military aspects, or science, or fighting back. It is about survival of the people after the attack has destroyed the infrastructure of society and anarchy reigns, and how they cope with it. Contrary to the opinion of many, it is not science fiction. It is an attempt to warn people who lived at the time it was written, and such an attack was a real possibility, what problems they would face if and when it occurred. The characters are well-drawn, the situations realistic and well-thought-out, and the subject was of immediate interest--in fact, its possibility haunted us all, in those days. In point of fact, it is the kind of situation that could, even today, follow any major natural disaster or terrorist act which would disrupt the normal functions of government and the operations of public utilities, resulting in anarchy and the "law of the jungle." When one reads the criticism of today's high school

child, that it was a "boring" story, it demonstrates how far we have come since those days of the Cuban missile crisis, for example, when I worked fifty miles from home, and worried when I went to work that I might be separated from my family, including my wife and five young children, by a nuclear strike and not see them again.
