Curriculum-Based Motivation Group: A Five Session Motivational Interviewing Group Intervention

Synopsis

This five-session motivational interviewing group intervention elicits and effects positive change in the lives of people struggling with life choices and personal behavior (e.g. addictions, compulsive behaviors, anger management, leaving an abusive relationship, illegal behaviors). This curriculum group model has broad application for all human service practitioners, treatment providers and educators. Also available in Spanish. See "Grupo Motivacional Con Base Curricular".

Customer Reviews

This book was the same as another book by this author. The only difference was the title and the other book was not good either. I wouldn't recommend them.

I use it with my clients who are dual diagnosed. And I appreciate the handouts that are easy to copy. Thanks

I already bought the hard copy of this book and wanted to easily use the handouts. So I bought the ebook thinking I could just print out the very nice forms. I searched the descriptions thoroughly and nowhere does it say - before you buy the book that you cannot use it as it was intended. Extremely disappointed. Is there a way for me to get my money back?????

I am a professional therapist that works with addiction clients. I have used motivational interviewing

for a few years. I just finished the "kindle" version of this book. Not a good experience. The written content was helpful, but the "kindleization" was a disaster. I was going to use this book to set up a 5 session MI group and was looking forward to not having to reinvent the wheel. The author had some very good ideas, but the translation to the Kindle made it a difficult tool. She has many 'forms' to use in the 5 sessions. But, the forms have mostly lost their formatting. The forms are indexed with page numbers, but the Kindle does not have page numbers, so finding them were difficult. Also, being in a Kindle format, I could not download the forms into my computer or printer, so I had to use PowerPoint Presentation to make up a facsimile of these forms. I ended up ordering a 'paper' copy of this book to reproduce the various forms. I would give the book 4-5 stars on it's own. This is my first disappointment in the Kindle, just not a good book to 'Kindleize'. Perhaps the book could be reformatted where the forms could be "indexed" so that the reader to go directly to the form. That would help, but losing the formatting of the form, along with not being able to print it would still make this book less desirable than the printed version.
